

Sphera BOMcheck Professional for Enterprise

Substance compliance management with enhanced regulatory scope

Reduce supply chain compliance risk and get actionable insights from high quality supplier data for an expanded library of restricted and declarable substance lists

As substance compliance requirements increase in scope, complexity and divergent requirements, it is essential to have the right tools to ensure your business can procure compliant parts through your supply chain and identify at-risk suppliers and products early.

A full suite of substance compliance tools

Sphera's BOMcheck Professional account type has been designed for enterprise customers who need a full suite of regulatory compliance and supply chain outreach tools for the collection, management and analysis of supplier data. With an intuitive, easy to use interface, built-in search engine, and additional regulatory list support, BOMcheck Professional enables market leading collection and management of your supplier part compliance data.

In addition to standardised bi-annual updates and guidance, BOMcheck Professional provides advanced disclosure tooling to lower the supplier survey overhead whilst increasing data quality. With advanced forecasting, automated follow-up reminders, analytics and additional supplier declaration request tools, manufacturers can drive regulatory substance compliance across the entire supply chain.

With expanded regulatory content support, improved user interface workflows, automation capabilities through the BOMcheck Platform API and dedicated customer support and training, BOMcheck Professional is an all-in-one enterprise solution to deliver your business's best-in-class substance compliance program.

Support for your suppliers

Sphera's BOMcheck platform provides easy to use declaration tools, ongoing training via the Supplier Support Series webinar program, full documentation and substance guidance in multiple languages to help suppliers create and share standardised, high quality part compliance declarations. BOMcheck further reduces the burden on suppliers and helps ensure high quality response rates and compliance data by pre-screening substances unlikely to be found in supplied articles with fallback for unusually manufactured parts and niche industries.

Software

A full suite of best-in-class platform tools to manage supply chain substance compliance

Content

Access to an expanded library of Restricted and Declarable Substance List (RDSL) content

Support

Dedicated support to ensure high value ROI for your business and your suppliers

With BOMcheck Professional you can...

Utilise an expanded library of regulatory content

- **Primary RDSLs:** collect compliance declarations for RoHS, REACH Restrictions (Article 67) and Candidate List (Article 33) substances, California Proposition 65, Batteries Regulation, COCIR and more.
- **Additional RDSLs:** collect compliance declarations for IEC and BOMcheck PFAS lists, EU POPs, TSCA, Other Regulated Substances, a dedicated Industry Substance List and vote on new RDSLs to add to the platform.

Drive substance compliance throughout your entire supply chain

- **Supply chain outreach tools:** invite, manage and survey your suppliers all from one easy to use dashboard or automate your supplier compliance data outreach program by utilising BOMcheck's Platform API.
- **Advanced data search:** high speed integrated search features with export tools for all common (CSV, PDF) and standards specific (IPC 1752A/B XML, JSON, IUCLID SCIP) file formats via dashboard and API.
- **Substance analytics:** identify non-compliant parts, the use of Substances of Very High Concern (SVHCs) and other specific substances in your supplied parts, specific at-risk suppliers and tier N occurrences.

Ensure high quality compliance data and response rates

- **Substance screening:** expert regulatory team screen out regulated substances unlikely to be found in supplied articles reducing reporting burden by up to 60% (fallback for uniquely manufactured parts and niche industries)
- **Supplier Support Series:** 24/7 dedicated customer support, full solution documentation site available in multiple languages and a quarterly supplier guidance webinar program for each BOMcheck version and more.

Automate your entire substance compliance program

- **Platform API:** implement a world-class substance compliance program and drive compliance from your PLM through your supply-chain and back into your in-house and third-party IT systems.
- **SCIP Connect:** automate your EU SCIP database dossier submissions with the most comprehensive and cost-effective SCIP integration on the market.
